Course Title: Elder Abuse and How it Affects Your Practice

Course Description: As the population ages in the U.S., cases of elder abuse are on the rise. Families, caregivers are stretched to the breaking point and resources are scarce. The recent mandated periods of social isolation have increased the prevalence faced by the elderly by as much as 84%. To be able to reduce the effects of elder abuse, healthcare professionals need to be able to identify and report these issues.

Learner Outcomes:

- The student will be able to define and identify "elder abuse" in their HA practice.
- The student will be able to identify the 7 prevalent types of elder abuse.
- The student will be able to describe the "warning signs" and possible causes.
- The student will be able to compare and contrast various assessment methods and what professionals can do to assist their patients to identify and prevent elder abuse in their practice.
